

## BATHTUB FISH

### Required Materials

- ♻️ clean plastic milk jug

- ♻️ permanent marker

- ♻️ scissors

### Step-By-Step Procedures

1. Turn the milk jug on its side so that the handle is at the top.
2. With the marker, draw a mouth shape on the base of the jug extending partway up the sides.
3. Cut along the lines with scissors, creating a wide mouthed scoop.
4. Using the marker, outline the edge of the mouth, add eyes and fin.
5. **TIP:** Be sure to check for rough or sharp edges where the mouth has been cut and use an emery board where necessary.
6. Use this fish in the tub, or make two and play catch with a bean bag!
