

BATH TUB SCRUBBER

Required Materials

- ♻️ 1 yard of nylon tulle (great way to reuse tulle after a wedding)

- ♻️ strong thread & needle

and

- ♻️ scissors

- ♻️ pins

These bath tub scrubbers are much like a body puff, except these are for scrubbing the bath tub clean.

Step-By-Step Procedures

1. Lay out the tulle flat and turn over a hem of 5 inches.
2. Keep folding it over in 5 inch sections until it is completely folded into a long 5 inch wide pile of tulle.
3. Pin it to secure.
4. Using a strong thread, sew the middle of the length together tightly.
5. Cut the edges of the length to remove end folds.
6. Using a running/gathering stitch, sew from one end to the other.
7. Draw up the tulle into a puff that fits into your hand and secure with stitches.
8. Pull the puff around to open up the layers and to create a nice circular puff.
9. Trim it into a ball with scissors.
10. Use this puff for cleaning and scrubbing your bath tub.

Note – This same craft can be used with a softer tulle to make puff's suitable for the body.
