

COFFEE CAN DRUM

Required Materials

- ❁ empty metal coffee can (with the plastic lid)
- ❁ construction paper
- ❁ glue
- ❁ scissors
- ❁ paint or markers (if using paint, you will need paint brushes and water too)
- ❁ dowels or sticks (from trees)

Optional Materials

- ❁ yarn, leather, feathers, fabric, beads, etc. (any bits of scrap material you may have around the house)

Step-By-Step Procedures

1. You have two options: Either paint the coffee can with paint or cover the can with construction paper.
2. Leave the plastic lid on the coffee can – this will be your drum head.
3. If using construction paper, cut it to the correct size of the coffee can to cover the can completely.
4. Glue the paper around the coffee can. Dry completely.
5. Using either paint or markers, decorate around the coffee can (over the construction paper). If painting, let dry completely.
6. If you would like, at this time, you can decorate your drum with any bits of scrap material that you may have around the house.
7. Put the plastic lid on the coffee can.
8. Using dowels or sticks, drum away on your new coffee can drum!
