

# PIZZA BOX STEPPING STONES

## Required Materials

- ♻️ 4 wire coat hangers

- ♻️ about a 13-inch pizza box

- ♻️ brick mortar mix

- ♻️ large heavy duty garbage bag

- ♻️ coarse sandpaper

- ♻️ utility knife (have an adult handle the utility knife)

- ♻️ packing tape (2")

## Optional Materials

- ♻️ stones or other objects to press into stepping stones

## **Pizza Box Stepping Stones**

**Page (2)**

### **Step-By-Step Procedures**

- 1.** Use the utility knife to cut lid from the pizza box (have an adult do this for you).
- 2.** You will need to stiffen up the sides of the box (use the packing tape to do this).
- 3.** Cut a square from the garbage bag to line the box with. Make sure that you make it big enough that it comes up the sides of the box as well.
- 4.** Place the 4 hangers in the box – hooked parts towards the middle to keep the stone sturdy.
- 5.** Mix the brick mortar per the directions – a quarter cup water per pound of mortar.
- 6.** Pour mortar/water mix in the pizza box until the box is about full.
- 7.** Wait a few minutes for it to set up.
- 8.** Spray Pam or put vegetable oil on a persons hand if you're going to make impressions. Otherwise, place in stones or other objects to decorate your stepping stone.
- 9.** Allow to set completely.
- 10.** Using the edges of the plastic bag, remove the tile from the pizza box.
- 11.** Remove plastic from bottom of tile.
- 12.** If necessary, use sandpaper to smooth the edges of the tile.
