

# PLATE CLOCK

## Required Materials

- ♻️ ceramic or plastic plate

Examples:

- ♻️ clock kit (from the craft store )

- ♻️ drill and a bit – appropriate for plate material used (please allow an adult to use the drill)

- ♻️ batteries (size appropriate for the clock kit)

## Step-By-Step Procedures

1. Drill a hole in the center of the plate (please have an adult complete this step). It works best if you drill a hole from the back of the plate.
2. Following the directions that came with the clock kit, install the clock pieces.
3. Now you can personalize your clock.
4. **Numbers:** There are various ideas on what you can use for numbers. You can use pictures, felt numbers, small objects, stickers, etc. Some clock kits even come with numbers. Or leave as it is and let the design on the plate speak for itself. The creativity is up to you.
